

## Environmental Policy

Policy Ref Number: GFS-EP02

### DETAILS:

Policy Date: 10/2/2020

Author: Scott Bailey

Griffin Fixing Solutions Ltd believe that we should achieve the highest standards of environmental performance and continually aim to minimise the environmental impact of our operations and our products.

We regard compliance with relevant environmental laws and the adoption of responsible standards where no legislation exists as minimum standards but aim for a higher level of performance than the base level of statutory responsibility.

Accordingly, the company is committed to:

- Complying with all applicable environmental legislation, regulations and standards.

Maintaining our Quality Management System (QMS) which is subject to independent third party verification on an annual basis. The QMS supports the implementation of our environmental policy objectives and demonstrating continuous improvement.

Continually developing and improving our operations and methods of work in order to:

- Reduce waste generation and encourage recycling of waste by our suppliers
- Reduce energy and water consumption and carbon emissions per tonne of production by our suppliers
- Ensure effective use of natural resources by members of our supply chain.

These aspects will be monitored, assessed and controlled within the FORS QMS against established improvement targets and objectives.

- Including assessment of environmental impacts in the business decision making at all levels.
- Understanding and reducing the environmental impact of the delivery and installation of our products to customers.

Raising environmental awareness through the development and training of our employees and open communication and consultation with our customers, suppliers, hauliers and contractors and any others on relevant environmental matters.
